

Saku Ölletehas

Siidrikunsti Meistriteos

Kampaania alla 30 000

EST

Taust

Kui Carlsbergi gruppi kuuluv Saku Ölletehas tuli turule uue, maailmas ainulaadse retsepti järgi valmistatud naturaalse siidriga, oli kindel, et seda toodet ei saa reklaamida tavapärase vahenditega.

Seetõttu kutsusime appi 10 Eesti tippkunstnikku, kellega igaüks lõi uutest siidritest inspireerituna ainulaadse kunstiteose! Kõigist teostest tehti fotod ning neist loodi kunstinäituse kataloogi stilis printreklaamiseeria. Originaalteoseid oli võimalik näha Tallinna kultuurielu keskkuntkohas asuva Telliskivi Loomelinnaku galeriinäitusel. See lõppes suure veebioksjoniga, millega saadud tulud läksid teoste autoritele.

Lisaks kümnele kunstnikule liitus projektiga ka meie disainer, kes lõi kaader kaadri haaval maaailma esimese lõuendile maalitud veebibänneri.

Palju tähelepanu pälvisid ka 3-liirtised lauarääkijad, mida võis leida nii baaridest kui ka restoranidest. Eestis on puhta ja naturaalse koduse öunamahla ja siidri valmistamiseks alati kasutatud klaasist 3-liitriseid purke ja just seetõttu kasutasime siidri tutvustamiseks just samu purke täis uut siidrit.

Lisaks toetasid kogu kampaaniat köiksugu erinevad unikaalsed ja kunstilised lisamaterjalid:

- siidriratas
- siidrivann/cooler
- T-särgid
- 2-pakid
- joogialused
- kleepsud
- jne.

Lahendus

Kampaania peamised traditsioonilised mediamadalid olid trüki- ja bännerreklaam, kus kasutati mõlemal juhul maksimaalselt võimalusi. Trükireklaamid ja bännerid ilmusid nii suurimates väljaannetes kui ka väga spetsiifilistes ja kindla lugejaskonnaga nišikanalites.

Teise suure osana kasutati ka promotsiooni baarides ja restoranides, kus uusi tooteid tutvustati otse tarbijatele.

Tulemused

Siidrikunsti meistriteose kampaania tööstis uue siidri oma segmendi turuliidriks, suurimat konkurenti edestati ligi kahekordset. Siidrid saavutasid juba viie kuuga oma aastase müügieesmärgi ja aasta lõpuks ületasid Saku siidrid oma müügieesmärki enam kui 70%.

Lisaks selgus Nielseni uuringust, et tarbijate heameel uue naturaalse siidri üle oli suur. Lausa 93% inimestest, kes on uut siidrit proovinud, plaanivad seda veel ostma. Inimestest, kes siidrit aga proovinud ei ole, plaanib seda kindlasti teha 88%.

ENG

Background

When Saku Brewery, a member of Carlsberg Group, launched a new natural cider using a recipe that is unique in the world, it was clear this product mustn't be advertised following the same old tracks.

That's why we asked the help of 10 Estonian top artists, who, inspired by the new ciders, created a one of its kind masterpiece each! All the works of art were photographed to create a series of print ads in the style of an art exhibition catalogue. The originals were displayed at a gallery exhibition in the heart of Tallinn's cultural scene Telliskivi Creative City. The exhibition ended with a web auction the proceeds of which went to the artists.

In addition to the ten artists, our designer also joined the project, creating a web banner painted on canvas frame-by-frame. The first of this kind in the world!

Our 3-litre table tent, which could be found at bars and restaurants, also got a lot of attention. Since Estonians traditionally preserve pure home-made apple juice and cider in 3-litre glass jars, we chose similar jars to introduce the new cider.

Naturally, the campaign was supported by all kinds of unique and artistic accessories:

- cider wheel;
- cider coolers;
- T-shirts;
- 2-packs;
- drink coasters;
- stickers;
- and so on.

Solution

The main traditional media channels of the campaign were print ads and banners, which we utilized to the max. Both prints and banners were published in more prominent media outlets and smaller more specific niche channels. A major part was also promotion at bars and restaurants, where consumers were targeted directly.

Results

The Masterpiece of the Art of Brewing Cider campaign pushed the new ciders to become the market leader in their segment, exceeding the sales of their main competitor twofold. The new ciders reached their annual sales target within just five months, and by the end of the year, the new ciders by Saku exceeded the sales target by more than 70%. Moreover, the Nielsen Survey revealed that consumers were very happy about the new cider range. As much as 93% of those who have tasted the new ciders are going to buy them again. Out of those who have not tasted the ciders, 88% are going to do it pretty soon.
