

# WHEN DO TRAFFIC ACCIDENTS INVOLVING CHILDREN MOSTLY HAPPEN?

In winter? No, in spring and summer! That's why we created the **SAFELY TO SCHOOL TEST** to correct such wrong assumptions: <https://koolitee.parimaeg.ee/>

We were shocked by the fact that in Estonia every year tens of children die in traffic accidents and **from 200 to 400 children** get injured. Therefore, we analysed in the reason of accidents and how children perceive traffic and their surroundings in collaboration with the Road Administration.

**Estonia's first web based school road safety test** was created for all parents whose children go to school by car, by bus or on foot. It will evaluate how safe is the way to school and back, brings out hidden threats and gives suggestions how to prepare for them.

During the dark and gloomy November **2465 parents** took the test. **1201** of them left their contact to receive a Family Insurance offer from Seesam Insurance. It's got to know your family is insured but it's better to prevent accidents!
