

# THE WORLD'S MOST PRECIOUS ART, MADE BY YOU

Terra Dragon is an earth-inspired interior art brand that combines creative philosophy with self-reflection. Clay is an earth teacher, a spirit of nature, manifested through this form and awakened by water and your hand. The Terra Dragon symbol is an embodiment of this ritualistic nature. Terra Dragon serves a unique idea where you can express your artistic clay poetry on different canvases to use as decorative art in your interior, or you can create a lifesize art straight to your wall or cover your entire home with natural healthy plaster paint in unique styles.

It is a dance between the elements, a sensory exploration of presence, where everything is connected by space. Take your Terra Dragon ceremonial cup, pour part of the clay powder in it and slowly start adding water. Stir it with a brush and keep adding small amounts of water to achieve the desired thickness. You can mix different colours together and customize the outcome. When we learn to approach clay with intention and mindfulness, it can help inspire reverence in our connection to nature, the self, and our community.
