

MAISON BEAST LOGOTYPES

Maison Beast merges fashion, music, art, and culture into a cohesive brand identity. Through our corporate branding, we seamlessly integrate our identity across multiple channels. We produce a brand-building YouTube channel, feature our brand in ready-to-wear collections, collaborate with artists, and create music videos highlighting our products.

We've pushed the boundaries of traditional branding, such as by personalizing a sports car for content creation and co-launching a branded burger with a restaurant. Constantly exploring digital innovation, we continue to push the limits while expanding the Maison Beast brand.
